1 Background

1.1 What is eGility?

eGility enables small and large companies to run single or multiple stores with an integrated fully functional Enterprise Resource Planning (ERP) system. With the power of ADempiere and Drupal, you have access to a sophisticated ERP system which includes supply chain management, financial management and reporting, customer relationship management and much more with an easy to use custom designed and fully branded web store.

1.2 Benefits of eGility for:

1.2.1 Drupal Audience

Enhance your website or webstore with a fully integrated customer management system (CRM) and enterprise resource planning system (ERP). Interactions with customers and suppliers are seamlessly reflected in both your drupal site and the Adaxa ERP/CRM.

1.2.2 Adempiere Audience

Leverage the award winning content management system that Gartner group labeled as a "Visionary" in 2010 Drupal CMS. Seamlessly extend your ERP to eCommerce. Maintain your brand presence on the web with no design limitations.

1.2.3 Online Commerce

Manage your customers, products, orders, fulfillment, Point of Sale, Promotions, Replenishments and Financials with an Enterprise grade ERP system while running your webstore interface with the latest visual and social media elements.

2.1 System Configurators

System Configurators store values used by eGility to communicate with Adempiere.

Name	Description	Search Key
AX_Currency_ID	WebStore Currency_ID (Default for AUD = 100)	100
AX_ImagesPath	Placeholder for images	http://demo.egility.biz/files
AX_PriceList_ID	WebStore Price List (Default value for Standard Price Lis...	101

AX_Currency_ID

This is the default currency ID for all orders raised from the webstore. Australian dollar has the value of 100.

AX_ImagesPath

This must be a fully qualified path for where product image files are stored.

AX_PriceList_ID

This is the default price list for all orders raised from the webstore. The Standard Price list has the value of 101.

2.2 Product Definition

For inclusion into product synchronisation, certain criteria must be met:

- Product must have a valid price listed under the price list (AX_PriceList_ID) given inside the System Configurator (see Fig 2.1)
- Product must form part of the product tree as shown in Fig 2.2
